

SPECIAL CONTROL PANELS

SPECIAL CONTROL PANELS

We provide special panels like Electrical & Pneumatic control for using electrostatic precipitator, Ash handling systems, material handling system, bag filters with custom design and also incorporated in client's requirements. These panels are specially designed with MICRO PLC. We not only provide excellent quality and workmanship but also provide service support to OEM and customers by way of designing the operation and service manual.

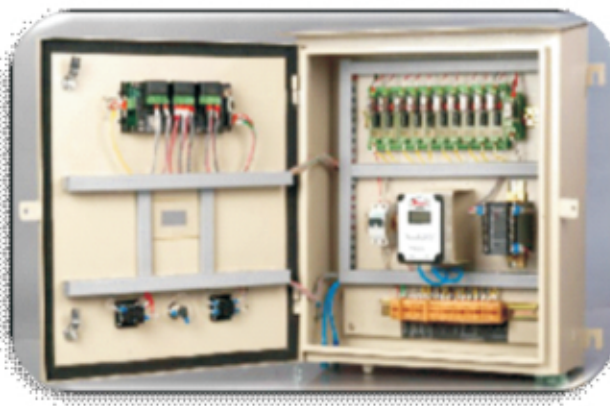

We are involved in providing electric control panel that is fully computerized with advanced microprocessor technology with printer for operation of the plants. For operation of the plant from keyboard, these panels are fitted with air conditioner, printer, and computer. In addition, these are fully equipped with protections like single phasing, overload, fuses, and sequence interlock.

SPECIAL CONTROL PANELS

TIMER PANEL FOR BAG HOUSES

- ★ Our Panels are specially designed for Dust collector Operations.
- ★ We designed Timer panels with Dust free enclosures
- ★ We offered to maximum 100 channels relay Outputs. With Remote mode operations through Customer LC/DCS
- ★ **UNICON** is a specialist in Timer Board Panels for the Bag House. We have supplied, installed & commissioned such numerous timer panels. We have designed and developed an extensive range of standard Dust Collector controllers with Proven reliability in practice.

- ★ The Motor Controller is a Solid State Sequencer, specially designed for Rapping Motor Control in ESP System. The design enables to select any sequence for number of electrodes. Thus gives full flexibility to program the Rapping System at site as per the nature and amount of dust of that plant.
